

WORKMASTER

Organize your workspace.

—
More
place
time
flexibility

More time and focus
on the essentials.

Good organization is the be-all and end-all

WORKMASTER minimizes tedious searching, brings order and helps to optimize processes.

With it you work as efficiently and safely as possible.

Save space, time and nerves.

ADVANTAGES AT A GLANCE

Everything under control

With the WORKMASTER tools, work materials and other important things are always ready to hand.

+ MINIMAL WALKWAYS

Maximum efficient

Small routine tasks and the constant search for work materials cost a lot of time. An organized workplace and optimized processes save space, time and money.

+ LOWER COSTS

Bye stumbling blocks

Brooms, buckets, helmets and much more are safely stored. The energy cube hanging upside down prevents the tripping over cables lying around and minimizes the risk of accidents.

+ HIGHER SAFETY

Plenty of space

The combination of tool trolley, cabinet, cleaning station and supply of electricity and compressed air creates plenty of space in production.

+ MORE ORDER ON ONLY 1m²

So smart

Flexible shift planning and fast handovers are much easier and smoother thanks to the standardized workplace.

+ FAST SHIFT HANDOVER

Fighting chaos

Missing parts are a frequent disruptive factor in production. In a standardized workplace, missing and damaged parts are discovered more quickly.

+ LESS TOOL WASTE

Eye for details

The WORKMASTER was designed with great attention to detail, taking into account modern work processes. The high quality materials and stable construction are suitable for intensive use over a long service life.

+ HIGH QUALITY

Work cleanly

Tools are no longer lying around on dirty hall floors, inclined surfaces reduce deposits. The optional extraction arm captures dust directly at the point of origin for a safe and dust-free working.

+ MORE CLEANLINESS

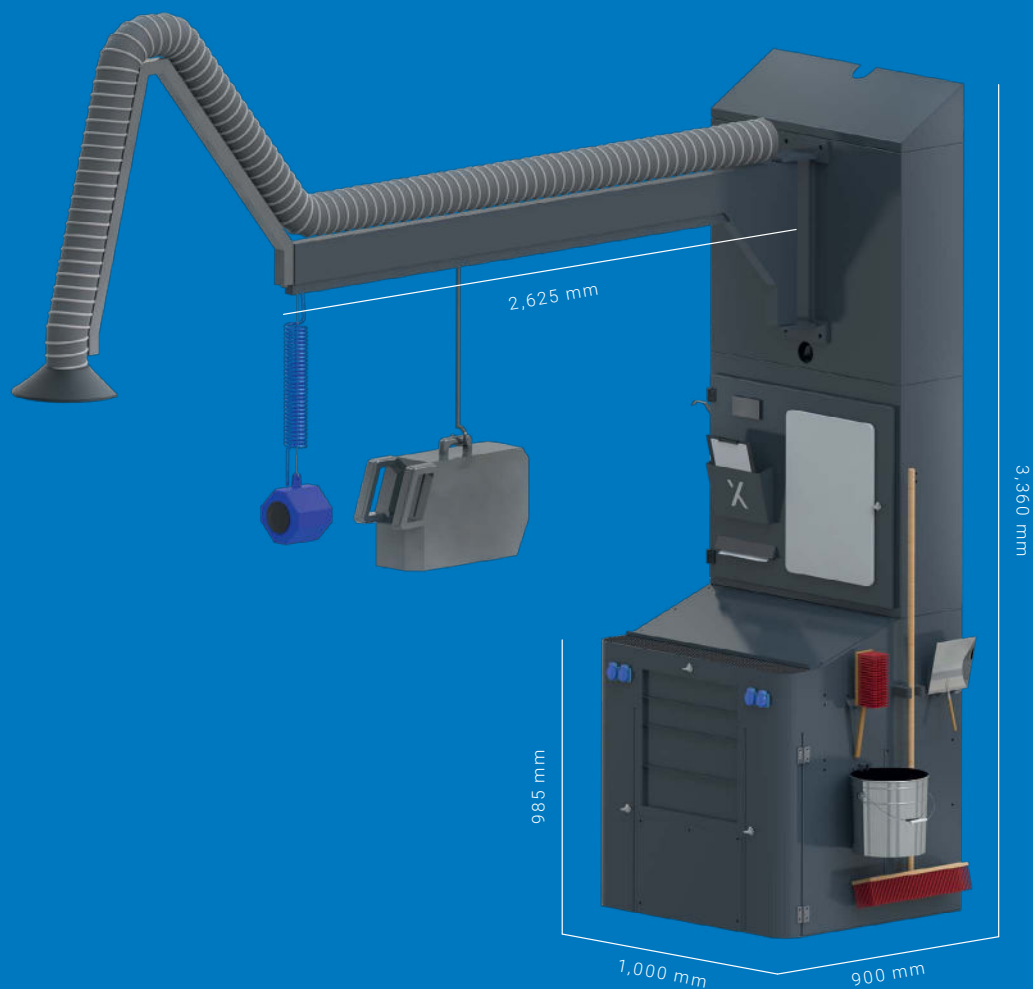

Good for the back

The swivel arm and height-adjustable energy cube make back-friendly work possible. This minimizes strain and is easy on the nerves. Employees work more efficiently and are more motivated.

+ ERGONOMIC WORKING

22% of all occupational accidents are trip, slip or fall accidents.

WORKMASTER

Workplace equipment for metalworking companies
with the aim of optimizing workflows and saving time.
More efficiency on 1 m².

Work safely

Cables, hoses lying around and general clutter in the work environment often pose a risk in productions and workshops. It is not uncommon for serious accidents to occur as a result of such safety deficiencies.

The employer must always ensure that floors and access routes are kept free of obstacles and that safe access to the workplace is guaranteed (§ 3a ArbStättV and § 9 BetrSichV).

A tidy and clean workplace helps to minimize sources of danger for employees and ensures their safety and health.

»Sources of danger for employees due to clutter in the workplace, damage to cables and restricted freedom of movement can be greatly reduced or even eliminated with the WORKMASTER.«

Jens Dreher, Managing Director
Metal-Service-Dreher GmbH

OPTIONS

- Supply from below
- Extraction arm
- Custom color & branding
- Extension modul 600 mm

ACCESSORIES SET

- Whiteboard incl. accessories
- Tool holder set
- Cleaning set
- Anti-slip mat
- Paper roll
- Clipboard

INSTALLATION

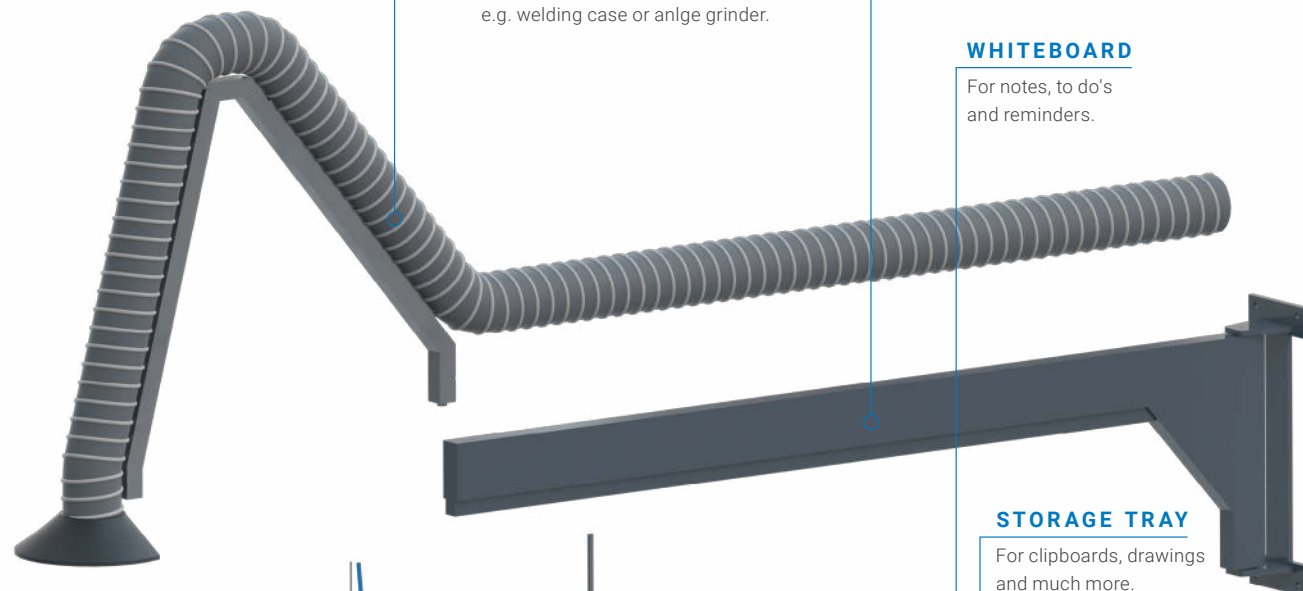

- Freestanding
- Back to back
- On the wall
- Easily movable
due to forklift bags

All in 1(m²)

EXTRACTION ARM OPT.

If required, an extraction arm can be integrated to the effective extraction of welding fumes and dust.

SWIVEL ARM (up to 100 kg)

Freely adjustable with 180° swivel range. Traverse trolley with suspension chain and snap hook for energy distributor. Hand chain hoist for attaching a tool carrier, e.g. welding case or angle grinder.

LOCKABLE COMPARTMENT

For storing tools and other working materials.

WHITEBOARD

For notes, to do's and reminders.

STORAGE TRAY

For clipboards, drawings and much more.

WELDING CASE

Possibility of suspension a welding case.
Not included

RADIO

Full sound with DAB radio + Bluetooth.

ENERGY CUBE

Energy cube with 6x SCHUKO® sockets, 1x CEE plug 16 A and 2x compressed air couplings.

PAPER TOWEL DISPENSER

Integrated in the housing. With protective sheet against flying sparks.

2 CAN/BOTTLE HOLDER

For welding spray, drilling/ cutting oil and much more
Position left or right selectable

2 LOCKABLE COMPARTMENTS AND 4 LOCKABLE DRAWERS

For storing welding helmet, hearing protection, safety goggles, tool box and other work materials. Private compartment with storage for smartphone incl. charging option, bag/snack and space for 2x 1,5L bottles in the door.

5 SOCKETS

4x SCHUKO® sockets, 1x SCHUKO® socket with USB

TOOL PERFORATED PLATE

Fold-out bracket for various tools such as angle grinder and much more.
Position left or right selectable

HOOK FOR WORK CLOTHES

Hanging facilities for helmet, welding apron and work coat. Position left or right selectable

SUPPLY

Connection line for electricity and compressed air.
Optionally from below

EXTENSION MODUL

Intermediate module 600 mm to raise the swivel arm.
Individual height on request

DRAWING TABLE

For storage and creation of sketches or drawings.

ANTI-SLIP MAT

Non-slip base for safe placement of spray cans or bottles.

CLEANING STATION

15 L bucket, hand broom and a sweeping set. Position left or right selectable

You no longer need:

tool trolley
locker
shelves
wardrobe
helmet rack
manual chain hoist
electricity
compressed air
waste bin
sweeping set
storage compartment
radio
tool wall
paper towel dispenser
drawing table
pinboard/writing board
can holder
collection for suction and much more
